The Coordination Centre's (CC) main field of activity covers education, adult education, research and development, advisory service and regional development. CC is involved in different regional and cross border projects focusing on rural development, agricultural/rural advisory and training, ecological agriculture, direct sale of agricultural products and renewable energy.

CC acts as Regional Advisory Centre in the West Hungarian Region, which controls the agricultural advisory activities in the region: yearly trainings and examinations of the advisors of the Hungarian Advisors List; trainings for farmers; other agricultural vocational trainings (dairy quality inspectors’ training, trainings for apiarists, plant protection experts, general higher level trainings for farmers).

Activities
